## Buscar pelo nome e "killar" os processos

Categoria : Linux

Publicado por [Anderson](#) em 29/12/2010

**Buscar pelo nome e "killar" os processos** - Eu sei, o título está totalmente confuso ;). Mas deixa eu tentar explicar. Seguinte: Vamos supor que você tem uma aplicação que gerou trezentos processos e você quer matar os mesmos. Quando você executa o **ps** ele mostra um monte de PID aí você pensa: - Nossa tem que dar um kill -9 nesse monte de pid? A resposta é não. Basta você usar o seguinte comando: `# kill -9 `ps -ef | grep &#39;termo a ser buscado ou nome do programa&#39; | grep -v grep | awk &#39;{print $2}&#39;`` - Have fun.
